Goodwin Creates Eminent Scholar Chair in Religion

A \$600,000 commitment from James "Jimmy" Goodwin and his wife, Virginia, will support the creation of the Goodwin-Philpott Eminent Scholar Chair in Religion at Auburn University.

The Goodwins' gift will be used to match \$400,000 in state funds under Alabama's Eminent Scholars Program. The million endowment will perpetually fund an academic chair in the Department of Religion. The chair will honor the Goodwin family and Harry M. Philpott, who served as Auburn's president from 1965 to 1980. Dr. Philpott continues to serve Auburn as a member of the Auburn University Foundation Board.

"Mr. Goodwin and his family have a legacy of support of Auburn University, and Dr. Philpott has a legacy of leadership and service to the university," said AU President James E. Martin. "We are pleased at this chair will forever honor the many great contributions that both have made to Auburn."

Dr. Philpott was a religion professor and minister before his career led him to university administration. Auburn's enrollment more than doubled under his leadership and at his retirement, Dr. Philpott had conferred more than half of the degrees awarded in Auburn's history.

During Dr. Philpott's 15-year tenure as president, the university saw a doubling of faculty, the creation of a number of programs and a rapid growth in facilities and budget. Among other accomplishments, Philpott was the second Alabamian in history to serve as president of the National Association of State Universities and Land-Grant Colleges. Following his retirement as president, the Auburn University Foundation elected Dr. Philpott to membership on its board of directors. He received an honorary doctorate in 1981.

Mr. Goodwin, a 1927 Auburn civil engineering graduate, developed companies in Alabama, Florida, South Carolina, Georgia and other southern states, signing and supervising more than a billion dollars in construction. Among the projects were the Birmingham Industrial Water System (\$25 million), a \$20 million

(Continued on page 2)

EAVES HONORED—The Joel H. Eaves-Memorial Coliseum was officially dedicated during the halftime of the February 10 basketball game against Kentucky. Coach Eaves '37, center, who had a 214-99 record from 1949-1963 while coaching basketball at Auburn, was honored by President James E. Martin '54, left, who played basketball under Coach Eaves, and Auburn Trustee Morris Savage.

Trustees Set New Standards for Admissions and Graduation

Meeting at AUM on February 4, the Auburn Board of Trustees approved a new set of guidelines strengthening university admissions standards; increased requirements for acceptance of standardized test scores and high school grade point averages in the admissions process, and set new standards for graduation.

Based on recommendations made by the University Senate, the new admission standards require a prospective student to have a high school diploma and high school coursework consisting of four years of English; three years of math including Algebra I and II, and one year of geometry, trigonometry, calculus, or analysis; a year of biology and a year of physical sciences; and three years of social sciences selected from history, economics, government, geography, or anthropology. Recommended but not required are one additional year each of science, social studies, and foreign language. This compares to the current requirement of 16 high school units, four of which may be vocational subjects, and one to three units of college

preparatory math, depending on curriculum.

Combined with the new coursework requirements are stricter guidelines for standardized test scores and GPAs. For Alabama residents and children of Auburn alumni, these call for a minimum score of 18 on the American College Test (ACT) or 870 on the Scholastic Aptitude Test (SAT), plus a minimum 2.0 GPA (on a 4.0 scale) on the courses listed in the high school coursework requirement. Non-

(Continued on page 3)

University Senate Approves New Core Curriculum

After more than two years of work and debate on the issue, the University Senate recently approved a proposal calling for enhancement of Auburn's core curriculum. The senate recommendation will now be sent to the president and the Board of Trustees for further action.

The core adopted by the senate calls for 63 hours of classes which would be taken by all students, regardless of their curriculum. Courses included in the core, and the number of hours required, include: English composition, 5; foreign

language, 5 (to be no less than the final class in the first-year sequence); math, 5; logic, 3; world history, 9; great books, 9; science, 15; social science, 9; and fine arts, 3. The senate's proposed core represents an increase of 10 hours over Auburn's current core requirement, which calls for nine hours of English composition, five hours of math or philosophy, nine hours of history or literature, 10 hours of science, and 20 hours of electives.

In addition to the five hours of English composition required by the new core, additional writing reinforcement would also be required in classes in other curricula. Many junior and above level classes would require a minimum of 2,400 words of writing assignments, which would be graded not only for subject content, but also for writing style and grammar. Such classes would be noted with the designation WR, for writing reinforcement. Another innovation would be the introduction of a great books series, which would include reading, interpretation, and discussion of selected works by such authors as Aristotle, Virgil, Shakespeare, and Thomas Jefferson.

According to J. T. Vaughan, dean of the College of Veterinary Medicine and chair of the senate's core curriculum committee, the proposed core is intentionally more rigid than the one currently in effect. "The existing core is an excellent base on which to build a new core," he said. "The main reason it is less effective than what we are proposing is because it has become a core in name only. We've seen such widespread substitution within the existing core that the nine hours of English composition has become the only non-negotiable item."

"Flexibility in this case is not a virtue," Dean Vaughan continued. "If flexibility becomes compromise, then it's an indictment of weakness. Our aim for the proposed core is to insure against substitution."

Although the new core has passed an initial hurdle with senate approval, a number of programs on campus remain opposed to it since the 10-hour increase in class requirements would have to be made up by departments revising their curricula to incorporate the core and still not exceed the 210-hour requirement for graduation.

Dean Vaughan noted that there are still a number of obstacles to be overcome before the new core can be adopted. "The

senate's approval of the core shows the faculty's determination to put some muscle into the academics of the institution," he said. "In all likelihood, it cannot be fitted into the current budget or implemented with Auburn's current human resources. Implementation will require imagination on the part of the administration and the trustees, and ultimately by the state legislature."

Ann Thompson '54

Thompson Named Vice President For Extension

Ann E. Thompson '54, director of the Alabama Cooperative Extension Service (ACES) since 1984 and acting vice president for extension at Auburn since 1986, was named vice president for extension during the Board of Trustees' Feb. 4 meeting.

In her new position, she will continue to direct ACES and will be responsible for University Continuing Education, the Center for Governmental Services, Telecommunications and Educational Television, the Center for Aging, and the Auburn Technical Assistance Center. Dr. Thompson will also be responsible for programming at the Auburn University Hotel and Conference Center when it is completed this fall.

Since coming to Auburn from the Virginia Cooperative Extension Service, where she was associate dean and assistant director for support systems, Dr. Thompson has overseen the linking of all ACES county offices through a computer network.

Winter Quarter Enrollment is New AU Record

Winter quarter enrollment at Auburn totalled a record 18,730, an increase of 2.1 percent over last year's previous record of 18,352. Both undergraduate and graduate enrollment saw increases, with the number of graduate students up a full 8 percent.

The record winter enrollment follows a record fall quarter in which 19,502 students were enrolled—the largest single-campus enrollment in Alabama history.

Auburn Education Chosen for Danforth Study

The Auburn College of Education is one of six university education programs in the nation selected to participate in the Danforth Program for Professors of School Administration, a privately-funded project to improve school administration. The program is sponsored by the Danforth Foundation, a St. Louis-based organization which supports a variety of programs encouraging faculty development in higher education.

Professors from each university will assess current programs and methods for preparation of school administrators, identify needed improvements, then design, implement and evaluate alternatives. The Foundation will provide financial and personnel resources to the faculty teams at each participating university.

Landa Trentham, acting head of the Department of Educational Foundations, Leadership and Technology, will head Auburn's faculty team. Other members include department faculty members Paula Short, Darla Twale, John Martin, and Lloyd Robison. In addition to Auburn, other universities participating in the 18-month project include Arizona State University, Fordham University, Miami University of Ohio, Temple University, and the University of Kansas.

Goodwin

(Continued from page 1)

Shades Valley Sewage Treatment Plant. He also built many airports, camps, and other projects for the Army and Navy during World War II, including the Craig Field at Selma. Later Mr. Goodwin developed several large natural gas transmission companies, including the South Georgia Natural Gas Company—which runs gas from Phenix City, Ala., to Tallahassee, Fla.; the Southeast Alabama Gas District, which serves all of South Alabama from Montgomery to Dothan; and Carolina Pipeline Company, which serves the major portion of South Carolina with offices in Columbia, S. C. Mr. Goodwin was chairman and chief executive officer of Carolina Pipeline for 25 years before it merged with South Carolina Electric and Gas in 1982, when Mr. Goodwin retired from business to look after his personal affairs.

Among his many services to Auburn, Mr. Goodwin is a member of the Auburn University Foundation Board, sponsor of the Auburn University Generations Fund which raised \$111 million for the university. Over the years, Mr. Goodwin and his family have made several gifts to Auburn supporting the library, the College of Veterinary Medicine, professorships, scholarships, and the Auburn University Band, which is housed in Goodwin Music Building, named in Mr. Goodwin's honor. He received an honorary doctorate from Auburn in 1976.

The Eminent Scholars Program was created in 1985 by the Alabama Legislature, which initially allocated \$9 million for universities to use as leverage for seeking private support for professorships to attract world-class scholars. Dr. Martin originated the program in the state and successfully sought support for the bill that created it.

Under the plan, which was sponsored by Rep. Jim Campbell of Anniston, universities get \$400,000 in state funds if they raise \$600,000 in private funds. The \$1 million is invested and the interest used to perpetually fund an Eminent Scholar Chair.

According to Jerry F. Smith, executive director of development, Goodwin's gift brings to seven the number of Eminent Scholar private commitments received by Auburn University for its main campus. Two full chairs and most of another have been matched by the state, and distribution of \$2.2 million in additional state appropriations this year is expected to provide matching funds for an additional chair and possibly part of another. Auburn currently has raised more Eminent Scholar private funding than the state has provided funds for matching.

"We would like to see the legislature keep and increase this public/private partnership of support going, especially since more private funding has been raised than the state has been able to match so far," Dr. Martin said.

"These chairs attract the nationally recognized, top-flight scholars who bring with them a wealth of talent from which all of Alabama's universities can benefit."

Smith's Poetry Honored with Brockman Prize

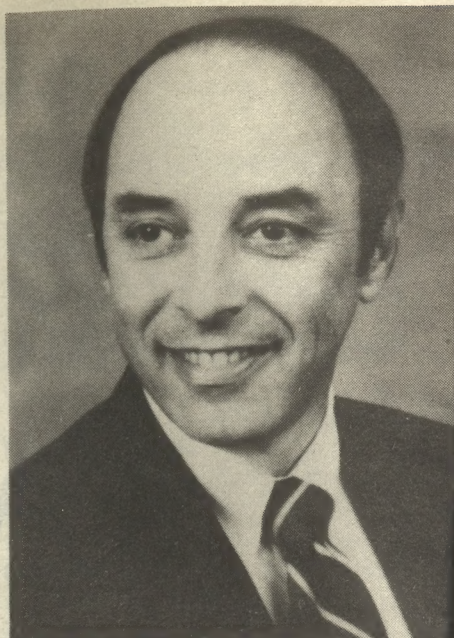

Birch-Light, a book of poems by Alumni Writer-in-Residence Rod Smith, is the winner of the 1987 Brockman Prize, presented annually to the best book of poems written by a North Carolina native. Mr. Smith, an assistant professor in the English Department and a native of Charlotte, N. C., is the author of ten books of poetry. *Banish Misfortune*, another collection of his poems, is due to be published by the Livingston State University Press this winter.

Pharmacy Alumni Honor Three for Accomplishments

The Auburn Pharmacy Alumni Association recently recognized Ben J. Eich '40 and Herman L. Lazarus of Birmingham and James E. Wright '53 of Foley for their exemplary service to Auburn and the pharmacy profession. During ceremonies at the annual meeting of the Alabama Pharmaceutical Association, Mr. Eich and Mr. Wright each received Distinguished Alumni Awards, and a Distinguished Service Award went to Mr. Lazarus.

Mr. Eich retired from Parke-Davis Pharmaceuticals in 1981 after a 39-year career. Twice selected as the company's manager of the year, he is also a former president of the Pharmacy Advisory Council.

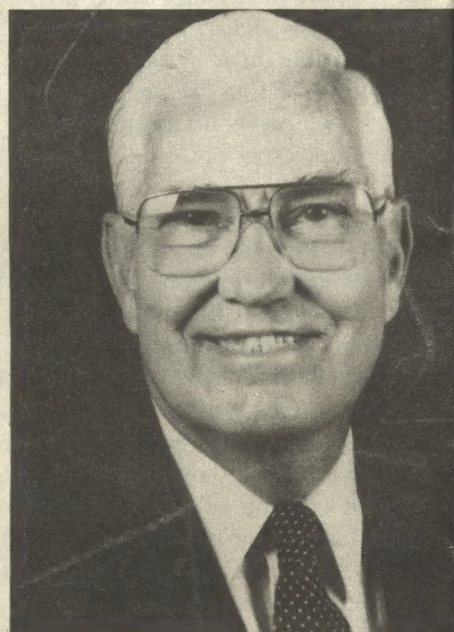

Mr. Wright has practiced pharmacy in Gulf Shores since 1956. Four times a Foley city councilman, he is chairman of both the school board and the housing authority. Mr. Wright is also a Pharmacy President's Club Member and serves as vice chairman of the Pharmacy Advisory Council.

Herman L. Lazarus

James E. Wright '53

Ben J. Eich '40

A graduate of the University of Mississippi, Mr. Lazarus is the director of the Department of Pharmacy for UAB Hospitals and an associate professor in the Department of Clinical Pharmacy Practice at Auburn. Named Preceptor of the Year by the Auburn School of Pharmacy and Hospital Pharmacist of the Year by the American Society of Hospital Pharmacists, both in 1978, Mr. Lazarus is also a past president of both the Alabama and American Societies of Hospital Pharmacists.

English Department Awards First Hargis Fellowship

Peter Button '86 of Birmingham is the first winner of the Florence Parker Hargis Graduate Fellowship, recently established in the Department of English. The \$6,000 scholarship, which will be awarded annually to a graduate student in English, honors the late Mrs. Hargis, widow of Birmingham physician Estes H. Hargis '17.

Dr. Hargis practiced at the University of Pennsylvania and the Mayo Clinic before establishing the Hargis Clinic and Hospital in Birmingham in 1930. Donations from the Hargis family also provided Auburn's first privately endowed supplements for outstanding faculty members through the Hargis Professorships in the English Department. Both the graduate fellowship and the professorships are funded by a trust administered by the Hargis Charitable Foundation.

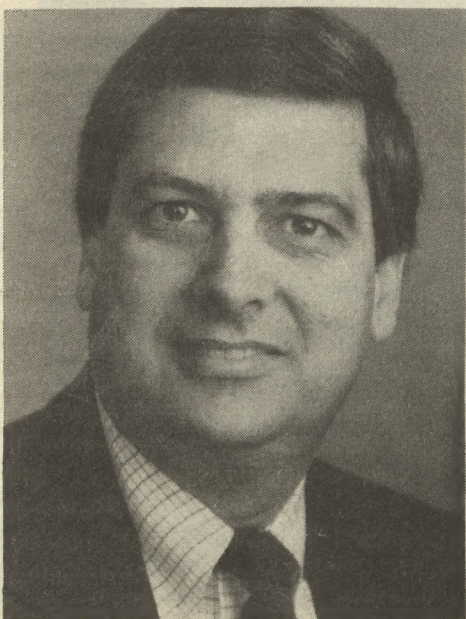

Counseling Task Force Hopes to Suggest Changes

A 15-member task force charged with identifying ways to strengthen Auburn's academic advising of students has been appointed by President James E. Martin '54. William H. Mason, associate dean of the College of Sciences and Mathematics, will chair the panel, which will include members from each academic school or college and the library.

The task force will address concerns raised in exit surveys of recent Auburn graduates who cited student counseling efforts in many areas as inadequate. Various counseling approaches will be examined across campus and at other institutions, and Auburn departments which are doing a superior job will be encouraged to help the efforts in other areas. Both undergraduate and graduate counseling will be included.

Madrigal Awarded Prestigious NEH Literature Chair

Professor of Spanish Dr. Jose A. (Tony) Madrigal will serve as visiting Professor

Jose A. Madrigal

NEW LOOK DORMS—Renovations to several of the hill dorms are nearing completion. The construction is part of a continuing project to eventually renovate all the dormitories on campus.

—Photo by Mike Jernigan

of the Humanities at Colgate University spring quarter as the recipient of the prestigious National Endowment for the Humanities' (NEH) Chair in Literature. Dr. Madrigal, who joined the Auburn faculty in 1970, received the Chair based on his national reputation in foreign language studies.

In addition to coordinating Auburn's Latin American Studies Committee and directing the Spanish graduate program, Dr. Madrigal is managing editor of the *Bulletin of the Comediantes*, a professional journal for Spanish language scholars. The author or co-author of 10 books and numerous other publications, he has been previously selected for both an NEH Summer Fellowship at Duke University and the Auburn Foreign Language Faculty's Award of Honor.

AU Annual Giving Program Sports Brand New Look

Auburn Annual Giving, which raises funds to support a wide variety of campus programs, now has a brand new logo.

Designed by art professor Ray B. Dugas, Jr., the logo is designed to help alumni recognize the program as a distinct entity, separate from other giving programs. Auburn Annual Giving is a direct mail appeal, the goal of which is to raise immediate funds for university programs not fully-funded by state appropriations. Donations may be designated to a particular school or college, or made as unrestricted gifts, allowing President Martin to use them where the need is greatest.

According to Jerry F. Smith '64, the new logo is an idea whose time had come. "Since we have so many programs with similar sounding names, we decided Auburn Annual Giving needed something to set it apart. No fund-raising program at Auburn is as vital to the success of the university. We hope that the added visual recognition will be an important step in keeping Annual Giving in the hearts and minds of Auburn people."

Mitra's Research Recognized with Wolfowitz Prize

Amitava Mitra, associate professor of management and a member of the Auburn faculty since 1979, is the recipient of the 1987 Jacob Wolfowitz Prize for theoretical advances in the mathematical and management sciences. The award recognized Mitra's paper, "Selection of the Most Diverse Multinomial Population," co-authored with three other experts and published recently in the internationally circulated *American Journal of Mathematical and Management Sciences*. The Wolfowitz Prize was established in 1981 to recognize "contributions of outstanding merit" which appear in the journal.

Dr. Mitra's work attempts to define indices which might aid in the selection of diverse populations. The research is useful to a number of types of studies including, political, biological, sociological, and economical.

Trustees

(Continued from page 1)

residents will be required to have minimum scores of 21 (ACT) or 970 (SAT), along with a 2.5 or higher GPA.

For transfer to Auburn, students with 47 or fewer transferable credit hours will be required to meet all freshmen admission standards and have a 2.5 GPA on all college work. For transfers with 48 or more transferable hours, a minimum 2.5 GPA on all college work attempted is required, plus a minimum 2.5 GPA in at least 30 credit hours of standard academic courses required by Auburn's core curriculum. These included at least three quarter hours in English, history, math, and natural science. While these are minimum standards for admission and transfer to Auburn, specific schools and colleges may have further requirements.

In addition to new admission standards making it tougher to get into Auburn, new degree standards will also make it tougher to get out. New guidelines for graduation require a 2.0 GPA on all work in a student's major and a 2.0 GPA on all Auburn or transfer work applied to a degree. Current standards require a 2.0 GPA on all credit accepted for graduation and, for transfer

students, a 2.0 GPA on Auburn course credits in their curriculum which are applied toward graduation.

The new admissions and transfer guidelines will go into effect in fall quarter, 1990. The new graduation guidelines will be implemented fall quarter, 1994, or six years after the publication of the new standards in the academic catalog, whichever comes later.

In academic matters, the board approved new doctoral programs in the Departments of Family and Child Development and Pharmaceutical Sciences, pending approval by the Alabama Commission on Higher Education, and okayed the establishment of a non-thesis master's program in English which will require more classwork than the current thesis option. The board also approved the renaming of the Department of Health, Physical Education and Recreation to the Department of Health and Human Performance.

In other action, the board approved the appointment of Dr. Ann Thompson, acting vice president for extension and director of the Alabama Cooperative Extension Service, to the position of vice president for extension. (See story, page 2.)

AU Business One of Fastest Growing Areas of Study

Better employment prospects, improved opportunities for women, and a positive perception of business studies have helped the College of Business become one of Auburn's fastest-growing academic units. As of fall quarter, a record 3,760 students—41.5 percent of them women—were enrolled in business, making up 19.3 percent of the total Auburn enrollment of 19,502. In the past five years, business enrollment on the Plains has increased 42.4 percent.

According to Dean Charles Kroncke, much of the recent growth has come about due to a change in the way people view a business career. "Compared to recent years, the eighties are a far more conservative time and students are more realistic in that they know they have to do something for themselves," he said. "The word is getting around that the study of business administration is interesting and that business schools are a good place to learn the analytical skills so important to most of today's careers."

While the continuing growth has caused some problems for the college, Dean Kroncke views the overall effect as positive. Auburn is responding to the increased interest in the business curriculum by adding faculty as funds permit, filling classes to the maximum level, and offering business minors to students in other areas of study. Dean Kroncke also said the college is re-examining some of its programs in an effort to ensure that it provides a broad educational experience for its students.

"We cannot let our business schools become simple trade schools. With so many students choosing to go to universities through colleges of business, it is incumbent upon business faculty members to think in terms of the general educational needs of society."

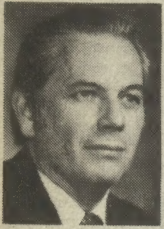

Points & Views

Here and There—

An Appealing Idea

By Jerry Roden, Jr., '46

Several months ago, a number of people seemed intent upon promoting legislation to establish English as the official language of the United States.

Roden

As I remember it, plans for national action followed successful adoption of similar legislation in two or three or more states. Apparently, everything was building toward an intense national drive, and then the effort subsided. However, the lull which followed and which continues at this moment presumably is only temporary, since all the reasons which gave the movement its initial impetus still exist.

When the subject first arose, I did not give it the attention it probably deserves. To me, English already was and always had been the official language of the United States by clear and indisputable implication. Thus, I saw little reason for going to any trouble and expense to affirm the obvious. Since then, several events have reminded me that these are quibbling and litigious times when one should not take anything important for granted.

Therefore, when the movement to designate English as the official language of the United States regains momentum, I probably will become a supporter. However, I desire to make my endorsement contingent upon the stipulation that we proclaim *standard English* as the official language of our country. For a definition of *standard English*, an excerpt from the *Prentice-Hall Handbook for Writers* (fourth edition) will suffice: "*Standard English* describes the speaking and writing of cultivated people. It is the variety of spoken and written language which enjoys cultural prestige, and which is the medium of education, journalism, and literature."

The more one contemplates, the more appealing becomes the concept of adopting a national standard which embraces the language of cultivated discourse and cultivated writing as the medium of education. Making that standard explicit should prove a desirable corrective for some untamed educational experimentation which creeps into our classrooms from time to time under the guise of *innovation*.

Mediocre Textbooks—During the past three years circumstances have led me to read through a number of textbooks of recent vintage. These works ranged from the first through the twelfth grade levels. A few of them were very good, but most of them were mediocre and boring, and all of them suffered from an obvious attempt to please everyone and offend no one.

All of us need to remind ourselves from time to time to take some of the pressure off textbook authors, publishers, and public school teachers so that they can and will take the risks which excellence demands.

Facts Matter—Normally, we consider a straightforward relation of unadulterated facts dull and

tasteless. A good tale requires the spice of wit and the sauce of invention, and nobody enjoys a good tale better than I. But in recent times, I have come to appreciate more and more the importance of pure, unvarnished facts.

Unfortunately, many of my recent students don't share my growing affection and respect for the verified and the verifiable. Somehow, we have brought up many young folk to believe that virtually everything is subject to personal interpretation and that one person's opinion is as good as another's. That attitude leaves us no common grounds for societal values, governmental regulations, or the pursuit of justice.

Esoterica for Everyone—

Theater Etiquette

By Bob Sanders '52

Associated Press recently sent out over its vast network a copy of some very important rules, the commandments of etiquette for theater goers. These rules are actually handed out at Lincoln Center and some other concert halls. They are aimed primarily at people who go to see live musical and dramatic performances. They should also be followed just as stringently, I think, by people in movie houses. Let's look at them briefly and maybe add one or two.

"Thou shalt not talk during a performance. Stay home if you aren't in the mood to give your full attention."

Amen. But let us carry this further. Don't explain! Example: Once upon a time, Frosty and I had the terrible luck to be sitting immediately in front of a whole family. The movie was, I presume, for family watching. But it wasn't simple enough for some members of said family to understand. So all throughout the movie, during every scene, the mother or father would patiently explain to one

of the children what was taking place. My blood pressure may never be the same again.

Also, never, never, NEVER ask, "What'd he say?" Never. If you missed it, you missed it. Ask about it when you get home. Because while you're being told "what he said" that you missed, you and everybody around you are missing the next few lines. They may not be great lines, but again they may be. You'll never know if you don't hear them.

An extension of this rule can also be applied to TV watching at home. I illustrate. Sometimes number two child will come walking in during the middle of a performance of some kind and ask, "What's happened?"

The response to this is, immediately, "Shut up!" Then, during the commercial you point out that you never ask "What's happened?" You sit and watch, and usually you can roughly figure out "what's happened." If you explain "what's happened," you'll both miss what's happening.

"Thou shalt not hum, sing, snap your fingers or tap your feet. The musicians don't need your help, and your neighbors need your silence."

No extra comment necessary.

"Don't rustle thy program. Restless readers and page skimmers aren't good listeners and greatly distract those around them."

And,

"Avoid opening cellophane-wrapped candies. Next to talking, this is the most general serious offense to auditorium peace..."

The same applies to popcorn at the picture show. Now, I like popcorn at the picture show. A show is not a picture show without it. But I think I consume it without excessive noise. Frosty, before I managed to civilize her, used to be a noisy popcorn eater. Well, not eater so much, but popcorn getter.

I'd motion my box toward her, silently saying, "Want some?" A mistake. She wouldn't just reach in and get a few of the exploded grains. She'd

GONE FISHING—Some visitors to the Auburn Fisheries Department apparently come to the campus straight from the old fishing hole.
—Photo by Mike Jernigan

reach in and play with them, shuffle them all about. Rattle, rattle, rattle. People would start looking. Rattle, rattle, rattle.

She didn't eat much, she just liked to play with it, I reckon. It took several at-home back-handings to cure her of that horrible habit.

"If you have a bad throat, open your throat-soothers between acts or musical selections."

I would add, generally speaking, if you have a bad cough, don't go. Don't go to the theater, don't go to church, don't go. Stay home. But, coughs will sneak up on the most devout anti-cougher occasionally. Then, apply the above rule.

I like this one: "Please, no sighing. Even if you're in agony, keep it to yourself. Your neighbor may be in ecstasy—which also should be kept under control."

And, finally, but at least as important as any of the other rules:

"Arrive on time, and don't leave early." There are exceptions and emergencies, of course. But, generally speaking, if you can't get there on time and don't expect to be able to stay at least until an intermission or some kind of break, don't go.

Well, there you have them, some excellent rules for attendance at just about any kind of performance or speech or lesson or whatever.

It should be noted, of course, that in a college town, the breaking of every one of these rules has become an art form within itself.

See you at the theater. I'll be the one with the box of popcorn. Frosty'll be the one with her hands tied to her sides...

Behind the Headlines—

Reading and Writing

By Kaye Lovvorn '64

It's amazing how many things we take for granted. Living in a community in which education is the main product and where our work and our conversations are apt to be based on something we've read, I seldom think of there being illiterates around us. After all, Lee County shares with Huntsville the highest average educational level in Alabama. Consequently, I was amazed to hear of two instances in one week in which *Alumnews* staff members routinely were asked if they knew the alphabet, apparently a standard question these days if you're getting an Alabama driver's license or an eye examination, but one which I had never heard in similar circumstances a few years back. Is the number of people who can't read and write growing? How many adults in Alabama can't do something you and I did by the end of the first grade?

Anyone who's ever worked with, for, or around me knows how agitated I can get about the necessity of writing competent, standard English, no matter what one's job is. But the people I'm fussing at when I go off on one of those diatribes are always high school—and often college—graduates. And, although they may find my insistence on the importance of spelling and grammar a bit inconvenient, there's never been a case of their not knowing their ABCs.

Granted, the majority of Americans don't think education is important. Annually we spend far more money on cigarettes, drugs, and alcohol than on education. College professors and American farmers each occupy approximately three percent of the nation's jobs. Perhaps each is an endangered species. Certainly, to use a Rodney Dangerfield expression, neither profession gets respect.

A few years ago my husband's aunt and uncle were dining out in Moscow while on a visit abroad,

GIFT TO PEBBLE HILL—Mr. and Mrs. John R. Stowe '33, left, of Birmingham recently gave Auburn's Center for the Arts and Humanities a secretary which had been made for Mr. Stowe's grandfather in 1880. Pictured at a reception held at the Center, located in historic Pebble Hill, are from left, the Stowes; Leonora Stowe Powell, Mr. Stowe's sister; Leah Rawls Atkins '58, the director of the Center for the Arts and Humanities; and Dr. Caine Campbell, acting dean of the College of Liberal Arts.

—Photo by Kaye Lovvorn

and an older gentleman came in who was immediately surrounded by the restaurant staff and nodded to and greeted by his fellow countrymen—treated royally, so to speak. Obviously, the man was a Russian celebrity. And after watching all the furor created by the man's presence, Uncle Walter inquired about the gentleman, expecting to learn that he was at least a top government official. Indeed, Uncle Walter and Aunt Bettie were assured, the gentleman was a very prominent and important man—he was a college professor.

I think of that experience every time I hear another story of why Alabama didn't get an industry because the company was concerned that the educational level wasn't high enough to have the staff to fill the jobs. Or when I read of an expected shortage of public school and college teachers. Or when I learn that another professor has left the teaching ranks for industry or an elementary or high school teacher has changed professions. Or that a line worker at GM often earns \$15,000 more annually than the average Auburn teacher.

I thought of that story again recently when I read of the ever-increasing number of illiterate people in the United States and the damage that illiteracy is doing to our national productivity and to our way of life.

According to a recent article by AP Business Writer Rick Gladstone, "The Department of Education estimates that 72 million Americans—one out of three adults—may lack the reading and writing skills they need to find work. And the number is growing annually by more than 2 million...."

Look at any statistics about education, and you'll find that the U.S. is falling lower and lower on the international scale. And as illiteracy increases so do unemployment and crime.

Once the richest, and most powerful, nation in the world, a nation built on the basis of the importance of education of all its citizens, are we going to succumb to being second rate? Or worse? I don't know about you, but I never wanted to live in an underdeveloped country.

Say Thanks to a Professor

Here's your chance to say "thank you" to your favorite Auburn professor. Last spring the Auburn Alumni Association Board of Directors voted to establish two Undergraduate Teaching Excellence Awards to honor current Auburn professors. Classroom interaction with Auburn undergraduate students rather than research and publishing will be the criteria on which the awards will be made.

Nominations are being sought for the first winners of those awards. If you would like to nominate a former professor (or two or three), write a letter saying why and send it to Teaching Excellence Awards, the Auburn Alumni Association, 116 Foy Union, Auburn University, AL 36849. The deadline is April 4. A committee of retired faculty will choose four finalists. The two teachers who will receive the awards will then be selected from those four by a committee from the Alumni Board of Directors. The chosen professors will be honored at a luncheon with the Alumni Board in May.

Don't wait to nominate your favorite professor. He or she may decide to retire before next year. Or go to work for GM.

Helfrich a Natural When it Comes to Clowning Around

By Mike Jernigan '80

Sitting in his "dressing room" talking prior to a show, you can't help feeling that Banks Helfrich is a clown waiting to happen. Though his movements and speech radiate energy, it shows in his eyes more than anything else. They sparkle with an energy all their own—an energy born of a drive to make people laugh.

For Banks, making people laugh is no joking matter. The Tampa native, a 1986 Auburn graduate with a degree in nutrition and foods, is one of 26 clowns in the 117th edition of the Ringling Brothers and Barnum and Bailey Circus—unabashedly billed as "the greatest show on earth." He lives in a four-by-six-foot train compartment, makes less than \$200 a week, and will perform in 500 shows in the coming year, but talking to him, in a cold, dimly-lighted hall while he puts on his makeup with the help of a hand-held mirror, you doubt he would want to be anywhere else.

It's opening night of a three-day show in Montgomery, another in a long line of opening nights for Banks. But the night is a special one because his Auburn roommate, John M. Teeple '86, who took a year off from school to be a circus clown himself, will be in the audience. The last time Banks performed in cavernous Garrett Coliseum, he wore the orange and blue of the Auburn track team, but tonight he will don more exotic attire. Guitar-sized shoes, a blond wig even Dolly Parton wouldn't wear, and a baggy shirt and pants of material refueled from a hundred outlet stores make up the uniform of the day. His makeup, applied quickly but with studied care, is outlandish enough to do Tammy Bakker proud.

At precisely 7:10, a few minutes before the main show begins, the ringmaster calls the clowns to action. Their job is to loosen up the crowd for the coming show with 20 minutes of—as P. T. Barnum might have put it—splendiferous shenanigans and bountiful but bombastic buffoonery. "Ladeeez...and...gentlemen, welcome to the Ringling Brothers and Barnum and Bailey Circus—the greatest show on earth!" For the next three hours, Banks will tumble over chairs and off a tightrope, plop on unsuspecting victims' laps, and evermore endear himself to another night's audience.

Bank's road to his role in the world's most famous circus started early, but it was at Auburn where he perfected many of the skills vital to success as a clown. He could often be seen pedaling around campus with other cyclists on their way to and from class, but his cycle had only one wheel. In his spare time between riding the unicycle, running on the Tiger cross country and track teams, and pursuing his degree, he also found time to teach a UPC class in juggling—another unusual skill he picked up "somewhere

BEFORE—Prior to each show, Banks spends about 20 minutes putting on his makeup and costume. During the evening's performance, he also changes costumes and props several times.

—Photo by Mike Jernigan

along the way." His memories of his days on the Plains are fond ones. "I really loved the isolation of Auburn, and I still miss it—especially when I'm in a big city with all the traffic and congestion. I still keep in touch with some of my professors, especially Dr. Robert Keith in nutrition and foods and Dr. Ada Van Gastel in English."

After graduating and moving to Atlanta to attend graduate school, Banks quenched his thirst to perform by doing stand-up comedy in night clubs. But then the circus came to town and held auditions for entrance to its prestigious clown college in Venice, Fla. He didn't hesitate to try out for a chance to perform "under the big top." The audition was a success, and after an intensive 10 weeks spent honing his harlequin skills and earning his "bachelor of fun arts" degree, Banks and a select few other Bozos-to-be were personally picked by Ringling Brothers and Barnum and Bailey producer Kenneth Feld to join one of the circus' two units, both of which were already on tour. He joined the circus in November, and has been slipping, stumbling, and clowning his way across America ever since.

Though some of his friends questioned his unusual choice of careers, Banks said

the reason he became a clown is as plain as the oversized nose on his face. "I love to perform, and the experience of performing in the circus is something that I can carry with me for the rest of my life. And the travel is great too. Very few people ever experience the magic of riding on a train, but I'm seeing the entire country from one. Really, I think most people would secretly like to be in my shoes [even if they are size 18s, bright blue with orange polka-dots].

"Performing is also very personally rewarding for me," he continued. "When I make people laugh I feel like a doctor who cured a disease. It's a rewarding feeling to make people smile and forget their troubles, even if only for a short time."

Bank's clown alter-ego doesn't have a name, but it is one that he has carefully developed since his days in clown college. "I think of myself as a 'little kid' kind of clown, one with overabundant energy that I can't control." But he is quick to observe that a clown doesn't always have to be either funny or energetic. "There's probably a little bit of a 'ham' in all clowns, but there are all different types. Clowns can be sad or silly or shy or lazy—whatever best suits their real personalities."

"Exuberant" best describes both Bank's style and personality. During the evening's performance he falls over objects both real and imaginary, slips on banana peels, and sits on the laps of unsuspecting children in the audience, much to their delight. Like all the circus performers, he has a wide variety of other responsibilities, ranging from holding lines for aerialists, to marching in the innumerable parades of men and beasts that break out ever so often during the course of the show. Despite Bank's love of performing, he still

AFTER—In the space of half an hour, Banks' transformation is complete, and he is ready for another night of clowning around as one of the 26 clowns in "the greatest show on earth."

is a little in awe of the controlled chaos that is the circus. "I still get scared sometimes, when I'm out there in the ring and I know everyone is looking at me. I can't always see the crowd, but I can hear and sense them and know if things are going well."

Things usually do go well, but in spite of the makeup, the props, and the outlandish clothes, it's not always easy for a clown to be funny. Both the repetition of numerous performances and the constraints placed on the performers by the unwritten rules of "circus etiquette" make the clowns' performance more difficult than it appears. "Getting emotionally ready for as many as three shows a day isn't easy, so I try and pace myself," Banks explained. "And being a clown is hard in other ways. In stand-up comedy, the hardest part is getting up in front of the audience—anything goes as far as getting laughs. The circus is different because it's family-oriented, and you have to entertain a broader audience while being more limited in what you can do to be funny. It's more of a challenge, but it's more rewarding too."

But the bright lights and satisfaction of performing are the glamorous side to circus life. Banks and his fellow clowns also must juggle the rigors of a six-day work week, the lack of job security inherent in one-year contracts, and the repair and maintenance of their own props and equipment. In addition, he uses much of his "free" time to tutor circus children in basic reading and writing skills. But Banks, one of eight children himself, is happy to be a part of an even bigger family for the immediate future. "The circus is really a closely-knit community of about 300 performers—like a great big family. Eventually, I want to get into some other kind of performing, maybe back into stand-up comedy. But right now, I really enjoy what I'm doing. For the time-being, I'll just take life one day at a time."

New Alumni Center Expected to Fill Variety of Needs

The Alumni Center, due to be completed in December, should provide the solution to problems inherent in the overcrowded Foy Union offices of Alumni and Development. When asked what they most looked forward to in the new Center, the Alumni Staff overwhelmingly answered, "Space!"

Running a close second to more space was the staff's wish for more communication among the different units and, in some cases, within the same unit. Now staff members occupy whatever spare space is available, being spread throughout the first and third floors. Communication can be difficult, especially when secretaries are down the hall or up the stairs from the bosses they serve.

Comments indicate that the staff expects fewer interruptions at the new building, since it will undoubtedly have a better layout of offices than Foy Union provides. A layout designed specifically for alumni and development functions will enable each unit to keep its staff in the same area while promoting communica-

tion throughout the whole office. Staffers are already predicting the Alumni Center will create more productive, efficient, and content employees.

The Alumni Center will provide an identity for the Alumni and Development Office—an identity of professionalism, productivity, and caring service. The building will be attractive and easy-to-find, and the staff looks forward to more windows, improved temperature control, a better phone system, improved filing and storage, and a staff lounge and patio.

On special weekends the Alumni Center will be an information and communication center for visiting alumni. Alumni will be better served and more likely to stop by to take care of business because they will have a place to sit down and relax while they pay dues, etc. Alumni groups, such as advisory councils, will take advantage of the meeting rooms for functions or an alumnus can simply stop and visit or arrange to meet a friend.

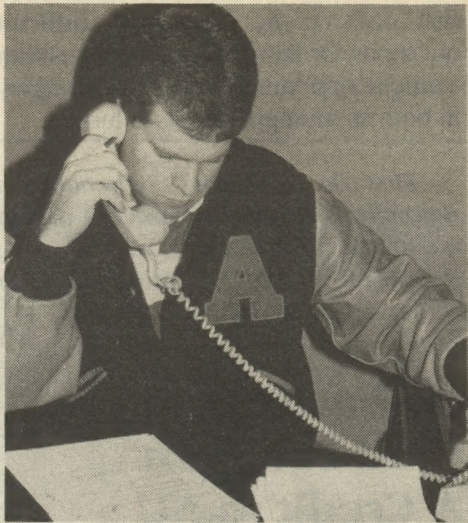

Another overwhelming hit with the Alumni Staff is the hope of a place to park for both visiting alumni and themselves. As Associate Director George Atkins said, "I'll finally have a place to park my car, so I won't have to get up at 4:30 in the morning."

Other comments from the Alumni Staff include:

Stephanie Johns Bond '71, assistant director of Alumni Programs: "Personally, I'm looking forward to having my own light switch in my office plus my own heating and air conditioning vent."

Gwen Reid, assistant director of Athletic Development, is looking forward to: "A quiet working environment. Now, I have exhaust fans and elevator motors buzzing in my right ear and two telephones and office mates buzzing in my left ear."

Debbie Strain Duncan '72, assistant director of Alumni Programs: "I will not have to use the floor as a work area. I will be able to hold conferences other

ALUMNI CENTER PHONATHON—Senior John Dobbs was one of many dedicated students who participated in the Alumni Center phonathon, which raised \$121,885 over a one-month period in the state of Alabama.

than in a hallway...Since my filing cabinet is kept in another location from my office, it makes it difficult to use my files. Also, having my secretary located in the same area will make communication and working situations better."

Programmer Chris Ford foresees that in the new Center he will spend "less time walking to the bathroom and more time on alumni stuff."

Lydia Skinner McClendon '82, assistant director of Publications and Research: "As a source of pride to alumni, it will offer many intangible benefits. It will extend the traditional fall visitation of most alumni to a year-round potential."

Julian Holmes '62, director of Planned Giving: "We must not think only in terms of benefits to alumni. The Center will benefit the development programs also—assuring benefits to students, faculty, programs (academic and athletic), and alumni. The average alumnus can now identify with a home on campus of outstanding quality."

DEBBIE'S DUNGEON—The new Alumni Center will allow the Alumni and Development Office to avoid scenes like this one: performing one's duties in an only slightly revamped closet. The victim of Foy Union's cramped quarters, Alumni Programs Assistant Director Deborah Strain Duncan '72, is looking forward to having room for more than one person in her office.

Book Review—

J. Kenyon Rainer's *First Do No Harm* Pulls No Punches

By Mary Ellen Hendrix '84

If you want a sugar-coated, reassuring look into the world of medicine, don't read *First Do No Harm*. In sharing his journey toward becoming a neurosurgeon, J. Kenyon Rainer '72 gives the reader a fascinating view of medicine for what it really is: human.

The doctors in this story aren't portrayed as gods, although the recounts of patients' traumas provide plenty of heroes. And the problems don't magically resolve themselves. Instead, the reader leaves the book thinking and appreciating the difficulties of medicine—this, in and of itself, makes the story worthwhile and brings deserved credit to Dr. Rainer.

The technical aspects of the book shouldn't intimidate readers. Dr. Rainer writes in amazing clarity as he describes the procedures involved in operating on the brain. We travel with him as he searches through the inner cavities of the brain in search of a life-threatening aneurysm or performs exploratory surgery on a six-year-old boy to discover a rare inflammatory condition. He shares many delicate operations with his readers; and, with each one, we see skills honed, decisions made, challenges accepted. But we also see tired surgeons, honest mistakes, and, of course, death.

Early in the book, Dr. Rainer appears (through a flashback in the story) as a student at Auburn. A freshman in 1969, he and his brother, Kelly, a junior, lived with their parents in Auburn. The parents leave town for the weekend, and the young men promptly decide it's a good time for a fraternity party. Lessons are learned quickly when Mom and Dad come home early and catch the boys amidst their frolicking. Dad evicts them from his house, and they aren't invited back for six months. He welcomes his sons home and says, "All I can ask of you two boys is that you be honest. If you're honest, you can keep our name good, no matter what may happen in your lives."

Six years later that advice proved invaluable. As an intern at Mobile General Hospital, one of Dr. Rainer's assignments was two months in the emergency room. Interns worked 24 hours on and 24 hours off. Eva Roberts was one of hundreds of patients who passed through the emergency room doors. But, with Eva, Dr. Rainer had missed diagnosing something from her X-ray—a badly fractured ankle. The doctor recounts how, with horror, he realized his mistake after he saw the radiologist's report several days later. He knew that she probably had already received treatment for the fracture, so a debate ensued in the intern's mind on whether to call Eva and tell her his mistake. He feared a malpractice suit.

But then he thought back to those words his father had spoken six years earlier. He called Eva to tell her of the fracture, make sure she had been treated, and apologize. She received his comments with anger. Three days later, the chief of surgery informed Dr. Rainer that Eva Roberts' attorney had scheduled a meet-

ing. The attorney said, "I was prepared to file a \$2-million medical malpractice suit against you, but my client changed her mind this morning. She said you were honest enough to call her to make sure she received proper medical care."

The meeting adjourned, but Dr. Rainer reflected on the absurdity of the situation: "Odd, I thought. I've made a thousand correct diagnoses and never received any money or even a compliment. I miss one diagnosis, and a lawyer wants \$2 million...how many lawyers could stay awake 36 out of every 48 hours, seven days a week, and never make a mistake?"

Alas, malpractice suits become a necessary concern of all surgeons, and Dr. Rainer presents with candor his views on nuisance lawsuits and discusses alternatives. But *First Do No Harm* doesn't dwell on malpractice as a central theme. Rather, the theme revolves around one question: What does it take to become a neurosurgeon?

Unfortunately, in Dr. Rainer's case, becoming a neurosurgeon meant sacrificing his family life. Throughout the book, his family takes a back seat to the art of learning surgical skills. Some of the most poignant moments of *First Do No Harm* involve Dr. Rainer's facing of the critical dilemma of patient vs. family. The reader sees how he and his wife drift apart, how the Rainer children—Laura and John—look forward to Daddy coming home only to discover that an emergency surgery has claimed his hours once again. And we understand the unresolvable difficulty of the situation. How can the doctor look into the patient's imploring eyes and say, "I'm sorry, but I haven't seen my kids in two weeks and have to go home."? The doctor can't and neither does Rainer.

Dr. Rainer's training took him from Auburn to the University of Alabama to earn his medical degree, then to an internship at Mobile General Hospital and neurosurgery residency at the University of Tennessee Medical Center in Memphis. After his residency he remained in Memphis to become part of a neurosurgery group. In 1983, when he was voted a full partner in the group, he had no one with whom to share the news. He and his wife had separated. In this context, the dedication of the book takes on enormous meaning. The dedication reads: "For Laura and John—I'll see you Saturday."

In 1984 Dr. Rainer returned to Auburn and began his own practice. He is now Chief of Surgery at East Alabama Medical Center. His training and practice has exposed him to the full spectrum of emotions. And, with *First Do No Harm*, he has shared some of those experiences. Naturally, some of a doctor's most emotional moments result from death, which Dr. Rainer calls "the constant companion." He tells us how doctors train themselves to remain detached emotionally from their patients, but sometimes the guard slips. Such was the case with Bobby, who was Dr. Rainer's patient and friend for two years before dying of a malignant brain tumor.

Critical decisions accompany the approach of death. The reader gets an insightful look at the use and misuse of life support systems. But the book also shows the miraculous side of death as Dr. Rainer recounts several of his patients' after-life experiences.

First Do No Harm is a well-written book that doesn't shy away from difficult questions. Dr. Rainer has provided us with a unique opportunity to see neurosurgery in both its triumphs and its failures.

First Do No Harm—Reflections on Becoming a Brain Surgeon (299 pages) is available for \$17.95 from Villard Books, A Division of Random House, 201 East 50th Street, New York, N. Y. 10022.

'Auburn Spirit' Card Program A Credit to AU

Since its introduction last year, the Alumni Association's "Auburn Spirit" credit card program has become one of the most successful college affinity card programs in the nation. As of Jan. 1, 1988, First Bankcard Center in New Orleans had received more than 9,400 applications for the cards, 72 percent of which were approved. The high approval rate for Auburn alumni is First Bankcard's best ever.

Alumni who feel they were denied a card without sufficient reason, or who have general questions about the "Auburn Spirit" card program, are encouraged to call the Alumni Office for assistance. Contact Theresa Bush, alumni accounting specialist, at (205) 826-4234. Some of the most frequently asked questions and their answers include:

Why was I billed a fee for my card even though I am a dues-paying member of the Alumni Association?

The probable reason is because you used an application picked up at a local bank or other location which was not computer-coded to indicate your alumni status. Call the alumni office and give us your name and account number to have the fee removed from your account.

I'm self-employed and have sufficient income to qualify for a card. Why was my application turned down?

Some form of written verification of income is necessary before the Bankcard Center can approve an application. W-2 forms, copies of tax returns, or a letter of credit from your bank are all acceptable.

I am a new graduate and a member of the Alumni Association, but I was turned down for a card. Why?

First Bankcard Center's general guidelines for approval of credit require a monthly income of \$1,500 for single persons and \$2,000 for married persons, as well as one full year of employment. New graduates not meeting these criteria can have a parent co-sign for the card. The Alumni Association is currently working with First Bankcard to establish a lower level of credit which can be made available to new graduates.

I'm a member of the Alumni Association, but I don't have many other credit cards and I was turned down due to insufficient credit references. What can I do?

Other types of credit references, such as a letter from a landlord, can take the place of credit card accounts. Call the Alumni Office for more information.

Can I convert my present Mastercard or Visa into an "Auburn Spirit" Mastercard or Visa?

No. While you can establish an "Auburn Spirit" card account and then transfer your balance from your present card, the program does not guarantee the same credit line which you may have with the old card. Also, there is no gold card currently available through the "Auburn Spirit" program.

How does my use of the card benefit the Alumni Association?

Every time you use your "Auburn Spirit" card, one percent of every dollar charged goes to the Alumni Association for use in enhancing reunions, club programs, and general operations. This helps enable the Association to provide better alumni services.

AU Naval Historian Suggests Joint Action In Gulf

By Roy Summerford '73
AU News Bureau

A joint naval operation by the United States and the Soviet Union might be the best way to keep the Persian Gulf sea lanes open during the Iran-Iraq war, says Dr. Frank L. Owsley, a naval historian at Auburn.

Dr. Owsley noted that President Reagan agreed to put U.S. flags on oil tankers of Iraqi ally Kuwait in an effort to keep Soviet influence from growing in the strategically important Persian Gulf. But, he said, cooperation between the superpowers may be more desirable than competition in the region, especially in view of the reluctance of European powers to get involved.

Besides reducing tensions between the two superpowers, a joint naval operation could make Iran less willing to initiate attacks on Gulf shipping, Dr. Owsley said. But, he added, Iranian religious zealots are so unpredictable that nothing short of total military defeat may deter them.

In spite of possible advantages of U.S.—Soviet Cooperation, Dr. Owsley said the Reagan administration is not likely to consider a joint operation with the Soviets to head off Iranian attacks on Persian Gulf shipping. The president is too distrustful of the Soviets, partly because of past instances of Soviet opportunism, to agree to such a pact, he said.

Joint naval operations have been a

common mode of keeping sea lanes open, Dr. Owsley said, citing a mid-19th century expedition by ships from Great Britain, France, and the U. S. against a latter-day Japanese warlord who—in defiance of the emperor—was blocking sea passage through his self-proclaimed territory. The ships settled that issue by blowing away his fort.

The danger of a solo operation for the U. S. is greater than a joint action would be, but it is too late for this country to back down without losing face and risking bolder action by Iran in the future, Dr. Owsley said.

The U. S. fleet can probably keep the Persian Gulf sea lanes open, but only if it is ready to knock out the Iranian naval presence, including missiles, in the gulf, he said. If that were to happen, Iran would probably retaliate by launching a worldwide terrorist campaign against U.S. targets far from the gulf, he added.

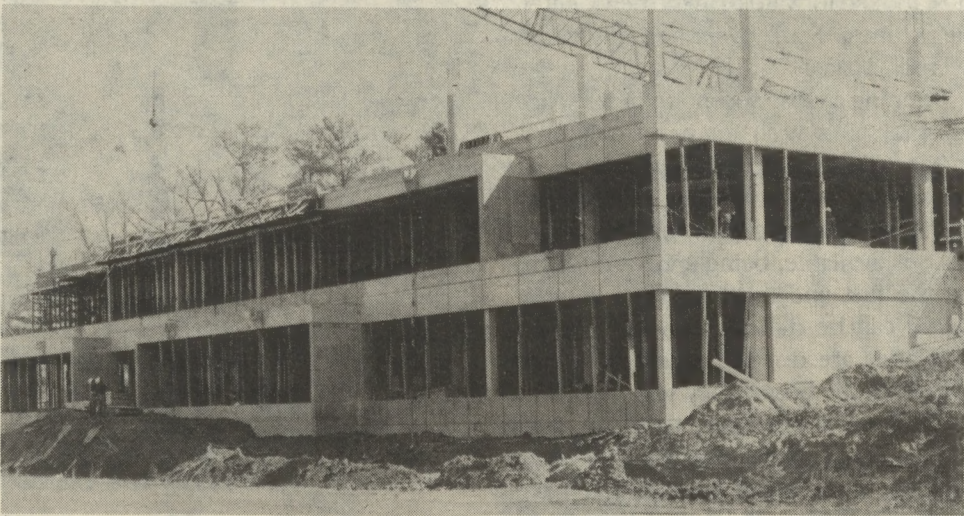

Dr. Owsley said he empathizes with U. S. leaders over the Iranian dilemma. "We have never dealt with a country that ignores all the rules of diplomacy and has at its disposal a large amount of sophisticated military equipment. I don't think the Iranians care if we blow away half their country. How do you fight a bunch of crazies?"

If Iran follows through with threats against U. S. vessels, the U. S. should take quick action along the lines of the Libyan raid, but it should not even consider invading Iran unless this country wants to get bogged down in a long and hostile occupation, as the Russians have in Afghanistan, he said.

Dr. Owsley said military force short of an invasion may be the only alternative by which the U. S. will be able to deal with Iran. He likened the situation to the Barbary wars of the early 19th century. Radical Barbary Coast rulers felt free to seize Westerners as hostages, while Britain and France paid tribute instead of defending their interests, so the U. S. acted alone in 1815 by sending a naval force to the Mediterranean to end the piracy.

Then, as now, the most radical Moslems considered Western Christians as fair game and their countries as weak and vacillating, he said. But the Barbary Coast pirates were more rational and less fanatical than the present-day rulers of Iran, he added.

"Sooner or later, we may be put in a position where we will have to do something," Dr. Owsley said.

CONSTRUCTION CONTINUES—Construction on the new \$8 million athletic administration complex is well under way, with completion scheduled for fall of this year. In addition to football offices, the building will contain locker and training areas and an Auburn athletic museum.

Jeff Moore Back As Tigers Ready For SEC Finish

Buoyed by the return of senior center Jeff Moore to the lineup, the Auburn basketball team is poised to be a factor down the stretch in the 1988 SEC race. After posting consecutive wins over Georgia and Mississippi State, the Tigers' record stands at 14-8 overall, 7-6 in the SEC at press time. The Tigers' ability to win on the road will determine how they fare in the coming weeks, as three of their last four games are away contests.

Since returning to the starting lineup in a 69-62 home loss to Kentucky, Moore has averaged better than 15 points per game in limited playing time. His return from a hand injury suffered early in the season has also allowed the Tigers to return to a fast-tempo style of play more suited to the athletes on hand.

Senior forward Chris Morris has carried the team in Moore's absence, averaging 19 points and 10.6 rebounds per contest. Sophomore forward John Caylor and freshman center Matt Geiger have also been mainstays for the Tigers, averaging 9.7 and 10.1 points respectively. Auburn's main problem has been the lack of consistent guard play, as nagging injuries and illnesses have hampered the Tiger backcourt all season. Sophomore Derrick Dennison has averaged 8.3 points per game to be the team's leading offensive threat at guard.

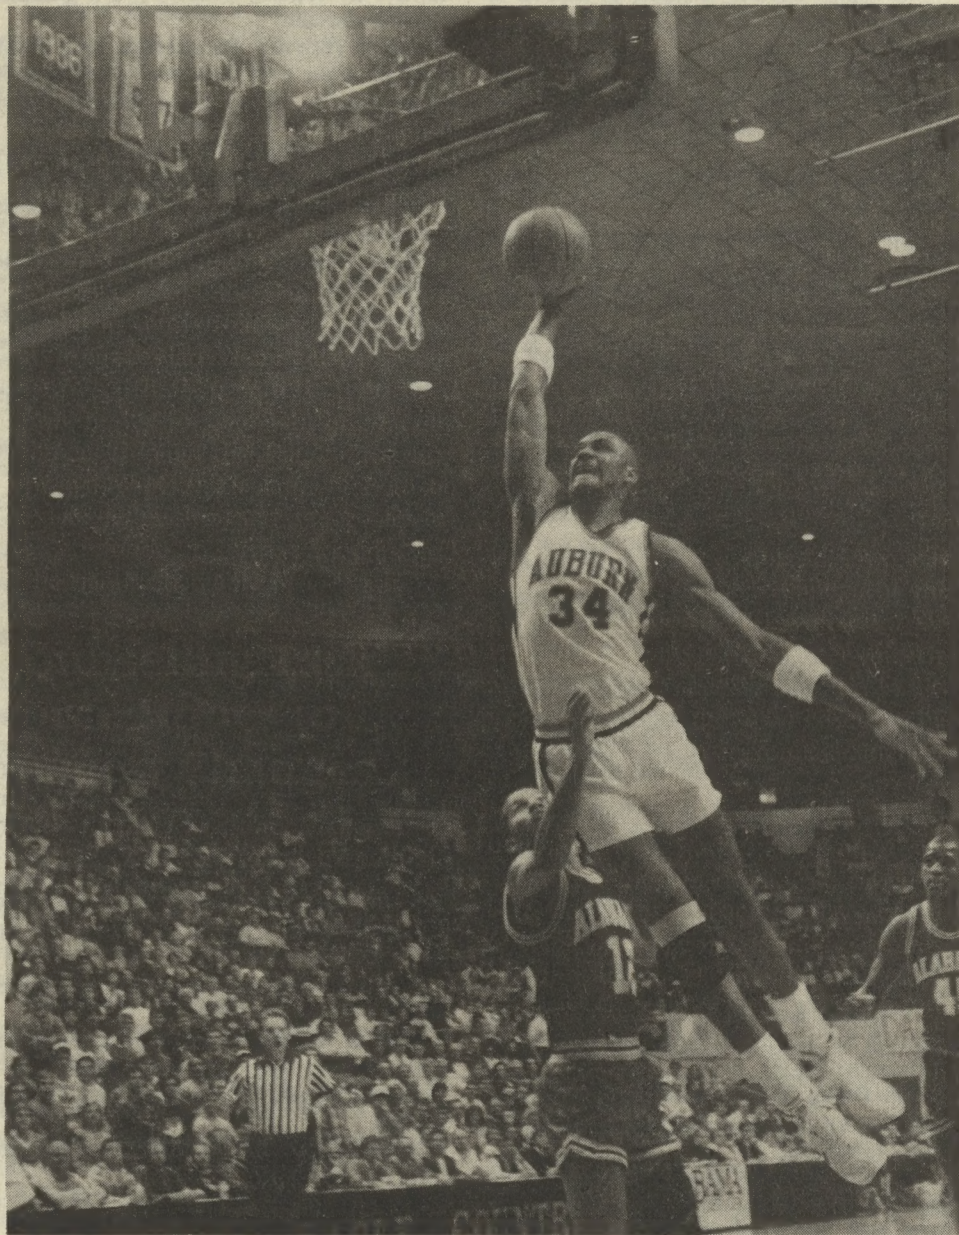

Tigers Have Blue Chip Recruiting Effort for 1988

Although the true value of Auburn's 1988 football recruiting class cannot be known until its members can be measured against their achievements four years from now, Coach Pat Dye's latest group of signees appears to be one of his best since coming to the Plains in 1981. The Tigers signed four of the state's top five prospects, and a number of other blue-chippers from around the Southeast. The recruiting emphasis this year was on speed, and it appears that the 1988 class has more overall quickness than any Tiger group in years.

Included among the Auburn signees were seven linebackers, four defensive linemen, four offensive linemen, four running backs, three quarterbacks, two defensive backs, and two tight ends. Thirteen signees are from outside Alabama, with five from Florida, four from Georgia, and one each from New Jersey, Tennessee, North Carolina, and South Carolina.

Auburn's 1988 signees include:

David Battle, a 6-4, 265-pound All-State defensive tackle from Johnson High in Huntsville. Had 70 tackles and 12 sacks as a senior. Rated number four on the

Birmingham Post-Herald's "Ten Most Wanted List" of top recruits in Alabama.

Corey Barlow, a 5-10, 180-pound defensive back from Atlanta's Fulton High. Had four interceptions and 73 tackles as a senior. Also rushed for 701 yards and 10 touchdowns as an offensive back. Runs 40-yard dash in 4.5 seconds.

Charles Brown, a 5-7, 190-pound fullback/linebacker from Dothan High. Played little his senior year due to injury, but averaged 13 tackles per game during career. Runs 40 in 4.6 seconds.

Herbert Casey, a 6-1, 175-pound All-State quarterback from Foley High. Rushed for 2,508 yards and 28 touchdowns and passed for 2,817 yards and 17 touchdowns during career. Runs 40 in 4.3 seconds. Rated number three on "Ten Most Wanted" list. Likely to play wide receiver for the Tigers.

Duncan Castleberry, a 6-4, 225-pound defensive end/tight end from Gadsden High. Voted "Most Valuable Defensive Lineman" in Gadsden. Runs 40 in 4.65 seconds.

Jeff Catullo, a 6-4, 280-pound offensive lineman from Cherokee High in Marlton, N. J. A two-year starter at tackle, voted to the All-South New Jersey team.

Larry Chapman, a 6-2, 205-pound linebacker from Jeff Davis High in

Montgomery. Had two interceptions and three fumble recoveries as a senior. Runs 40 in 4.7 seconds.

Darrel Crawford, a 6-2, 220-pound linebacker from Fairhope High. Had 108 tackles, six sacks, and two interceptions during senior season. Runs 40 in 4.6 seconds. Rated ninth on "Ten Most Wanted" list.

Tim Cromartie, a 6-2, 265-pound defensive tackle from Godby High in Tallahassee, Fla. Averaged 100 tackles, 10 sacks per season in high school. Runs 40 in 4.75 seconds. Listed as one of South's top 35 prospects by the *Atlanta Constitution*.

David Crum, a 6-2, 190-pound quarterback from Auburn High. Completed 82 of 142 passes in senior season. Runs 40 in 4.7 seconds.

Travis Galloway, a 6-2, 230-pound All-State offensive lineman from Lakeland (Fla.) High. Played center in high school. Runs 40 in 4.9 seconds and bench presses 420 pounds.

Chris Gray, a 6-4, 278-pound tight end/defensive end from Homewood High. Had nine receptions for 128 yards and 1 touchdown, and 67 tackles and three sacks on defense. Runs 40 in 4.8 seconds.

Chucky Johnson, a 6-4, 260-pound All-State defensive lineman from 71st

Senior High in Fayetteville, N. C. Played tight end on a run-oriented team. Key blocker on team that won 4-A state championship.

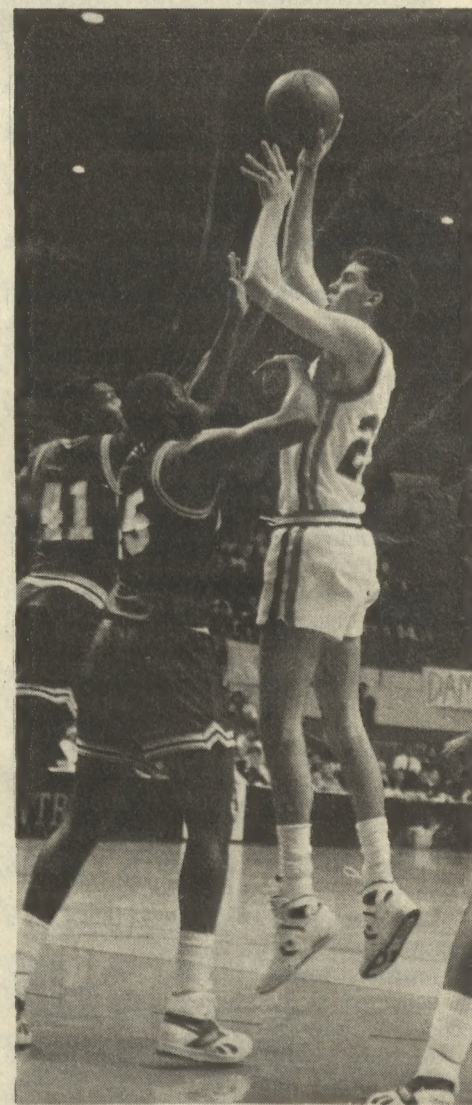

Ed King, a 6-4, 270-pound, three-time All-State lineman from Central High in Phenix City. Graded above 80 percent in every game as a senior. Runs 40 in 4.9 seconds. Rated number one on "Ten Most Wanted" list and a *USA Today* and *Parade Magazine* Prep All-American.

Corey Lewis, a 6-2, 203-pound All-State quarterback from Gallatin (Tenn.) High. Passed for 1,107 yards and seven touchdowns and ran for 671 yards and 15 touchdowns. Runs 40 in 4.8 seconds.

Henry Love, a 6-2, 215-pound running back from Lithia Springs (Ga.) High. Prior to breaking his leg in third game of senior season, rushed for 529 yards and five touchdowns on 73 carries. Rushed for more than 1,500 yards during junior season. Listed as one of top 10 prospects in Georgia by *Atlanta Constitution*.

Kevin Morgan, a 6-5, 241-pound All-State offensive lineman from Hannah High in Anderson, S. C. Graded 96 percent for his senior season and had 48 knockdown blocks. Runs 40 in 4.8 seconds.

Clarence Morton, a 6-4, 195-pound tight end/linebacker from Maplesville High. Had 154 tackles and six intercep-

tions during senior year. Runs 40 in 4.6 seconds. From the same school as former Tiger fullback Tommie Agee.

Al Nash, a 6-3, 220-pound All-State linebacker from Jess Lanier High in Bessemer. Led team in tackles as a senior with 80. Also had five sacks and two interceptions. Runs 40 in 4.7 seconds.

Curtis Peterson, a 6-0, 180-pound All-State running back from Greenville High. Helped lead Greenville to the 5-A state championship his senior year. Averaged 11.5 yards per carry while gaining 1,312 yards.

Bennie Pierce, a 6-4, 240-pound All-State linebacker from Lowndes High in Valdosta, Ga. Led team in tackles and sacks as a senior and also played fullback on offense. Runs 40 in 4.6 seconds.

Vince Powell, a 5-10, 185-pound All-State running back from Cardinal Gibbons High in Ft. Lauderdale, Fla. Rushed for 1,496 yards and 15 touchdowns as a senior. Runs 40 in 4.2 seconds.

Richard Shea, a 6-4, 240-pound All-State defensive lineman from Mountain Brook High. Had 113 tackles and nine sacks while alternating at end, tackle, and noseguard his senior season. Runs 40 in 4.9 seconds. Ranked number five on "Ten Most Wanted" list.

Alex Smith, a 6-0, 210-pound running back from Lakeshore High in College Park, Ga. Rushed for 795 yards as a senior tailback on a fullback-oriented team. Also gained 1,300 yards at fullback as a junior. Runs 40 in 4.4 seconds. One of top 35 prospects in the South according to *Atlanta Constitution*.

Tim Tillman, a 6-2, 245-pound defensive lineman from Theodore High. Had 141 tackles, two fumble recoveries, and an interception as a senior. Runs 40 in 5.0 seconds.

Dennis Wright, a 6-1, 180-pound All-County defensive back from Boyd Anderson High in Lauderdale Lakes, Fla. Had four interceptions as a senior and also rushed for 350 yards and 6 touchdowns on offense.

Larry Young, a 6-4, 205-pound linebacker from Lakeland (Fla.) High. Led his team in quarterback sacks as a senior. A two-time All-County and All-Area selection.

Baseball Tigers Hope to be Big Hit This Season

With a veteran infield, strong pitching, and four sluggers who batted .306 or more in 1987, Coach Hal Baird and his Tiger baseball team are a strong bet to improve on last season's 42-18 record and 20-11 SEC slate. Auburn finished the '87 season with a third place finish in the SEC Tournament and its first NCAA Tournament bid since 1978. In their first series of the '88 season, the Tigers took three out of four games from the Catamounts of West Carolina.

The entire infield returns this season, along with an experienced pitching staff and several promising new players. This year's Tigers, position by position, include:

Catcher: Jeff Livesay returns for his senior season behind the plate. He hit .306 in '87, with 8 home runs and 36 RBIs.

First Base: Frank Thomas batted .359, with 21 home runs and 68 RBIs, during his freshman season last year on the way to being named All-SEC. During the off-season, he also was a major part of the American team which competed in the Pan-Am games.

Second Base: Tony Haney returns for his senior season at second after hitting .326 with 7 homers and 42 RBIs in '87. The all-time Auburn career leader in doubles, his 25 two-sackers last year set a new Tiger record.

Short Stop: Junior Ed Dilks should provide steady play at short after batting .285 last season. He also had 1 homer and 17 RBIs in the '87 campaign.

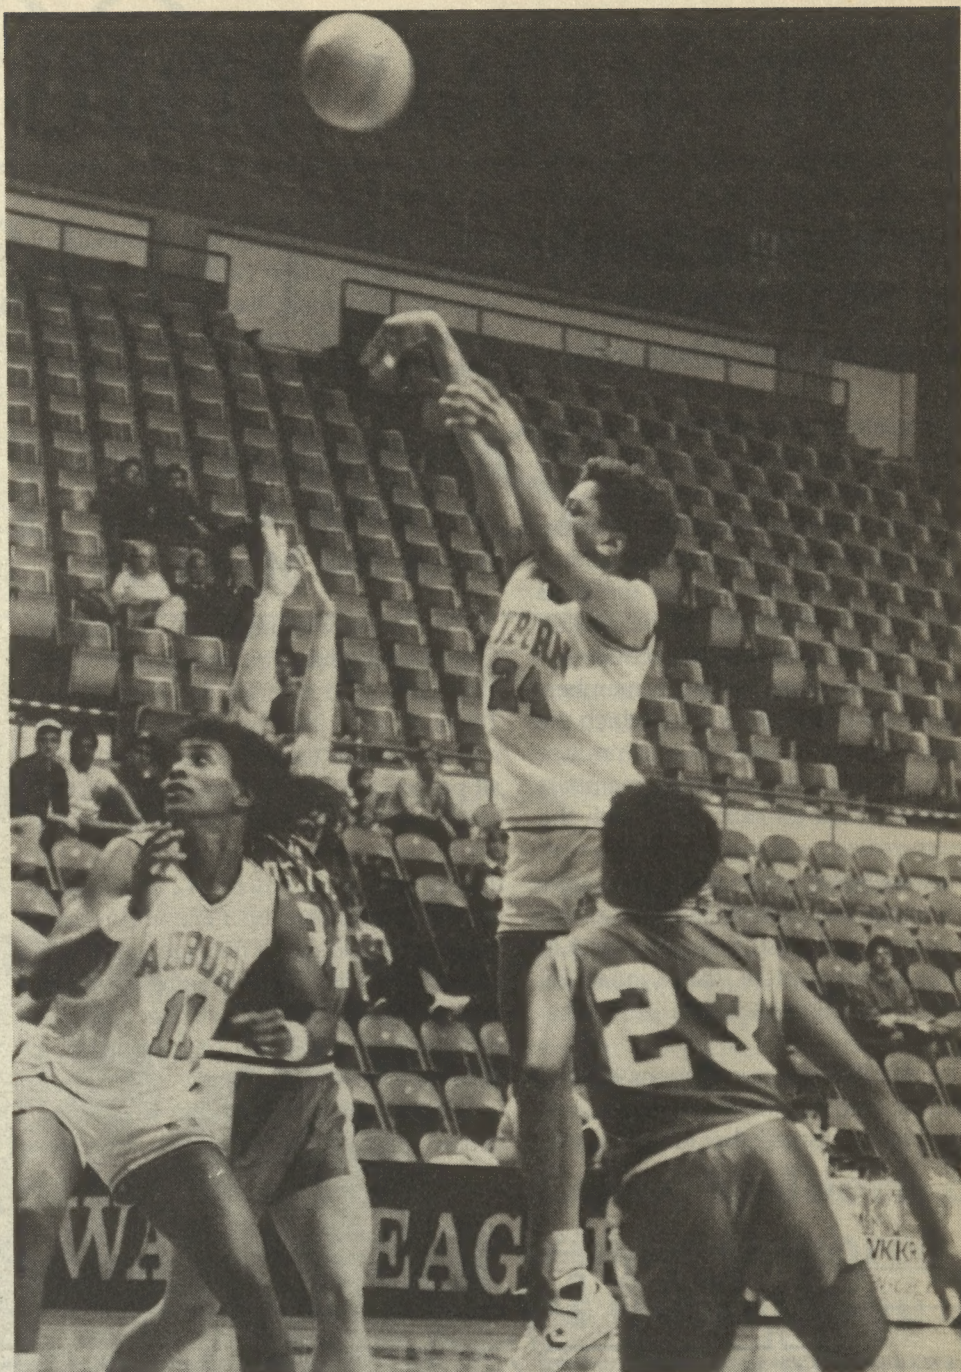

Third Base: Senior Kevin Henry returns after finishing last year on the SEC All-Tournament Team. He led the team in '87 with a .370 batting average, 7 homers, and 49 RBIs.

Left Field: Junior Clark Preble, a junior college transfer who sat out last season, is expected to be the starter in left field.

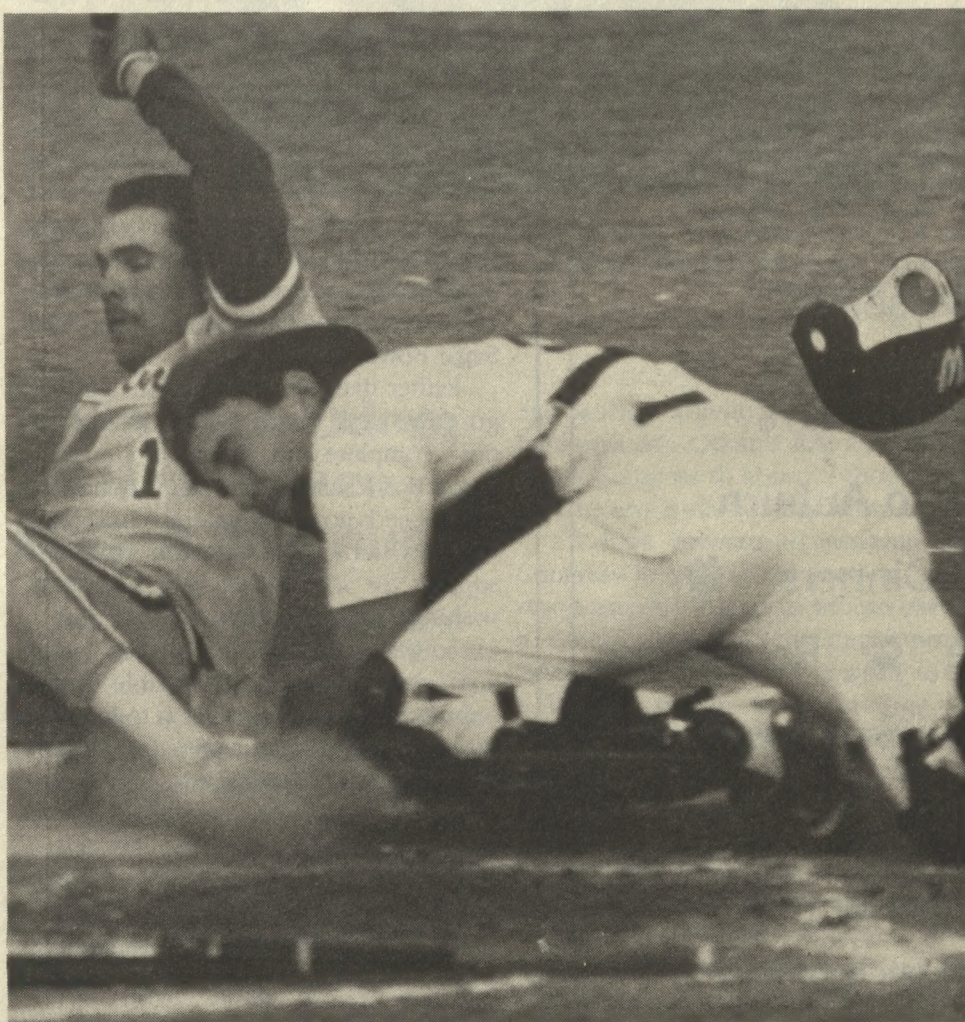

Center Field: Freshman Andy Albrecht has been impressive in pre-season practice and is expected to start in center field.

Right Field: The Tigers will platoon in right field, with senior Steve Burroughs (.215, 1 homer, and 17 RBIs in '87) and sophomore Ethan White (.216, 10 RBIs) sharing playing time.

Pitchers: Right-handers Stacy Jones (junior, 9-6 record, 4.24 ERA), David Adams (senior, 4-2, 4.85 ERA), and Tommy Youngblood (sophomore, 2-2, 7.13 ERA), and left-hander Scott Renner (sophomore, no record, 1 save) will handle the starting pitching. In the bull pen for the Tigers will be right-handed junior Gregg Olson (11-1, 10 saves, 1.26 ERA), an All-SEC and All-American performer who led the nation in ERA last season and recorded 96 strikeouts in 71 innings, and fellow right-hander Greg Randazza, a freshman.

SHOOTING FOR AN NCAA BERTH—Freshman Patrena Scruggs (24) shoots for two during a recent game, while senior Mae Ola Bolton (11) sets up for a rebound. The Lady Tigers, defeated only once and ranked second in the nation, are aiming for a final four berth in 1988.

Lady Tigers Clinch Share of SEC Title, Look to Final Four

The Auburn Lady Tigers, riding the crest of a 23-1 record, a number two national ranking, and a 15-game winning streak, continue to be on track for their goal of going to this year's NCAA Final Four. They have already clinched at least a share of their second consecutive SEC title with an 8-0 conference slate, and look to be the favorites to win the title outright with only an away game at Vanderbilt remaining.

Following the SEC Tournament in Albany, Ga., the Lady Tigers will be looking to improve on last year's final eight appearance in the NCAA Tournament. Coach Joe Ciampi and his team have made little secret of their intent to go all the way to the championship game this year, and while he is happy with the team's success so far, Ciampi is quick to point out that the Lady Tigers have more goals left to realize.

"Our success this season has come from our defensive game," he said. "We will have to continue our aggressive defensive style of play to remain successful. I am proud of the way this group of young ladies has played together as a team, but our season is still far from over."

Nominations Sought For '88 Teaching Excellence Awards

Nominations are now being sought for the first Alumni Teaching Excellence Awards, established by the Auburn Alumni Association Board of Directors to recognize outstanding undergraduate teaching. Honorees will be selected on the basis of classroom performance alone, regardless of publishing or research activities.

A committee of retired faculty members will select four nominees from which the winners will be chosen by a committee of the Alumni board. Two faculty members will be so honored each year, with the winners invited to attend a luncheon with the Alumni board where they will receive their awards and a \$500 honoraria. The two winners will also be recognized in the *Alumnews* and at the annual fall reception for Alumni Scholars and Professors.

The deadline for nominations is April 5. Alumni, students, or others wishing to nominate a faculty member for the awards

should send a letter of nomination, explaining why their candidate is deserving, to: Teaching Excellence Awards, Auburn Alumni Association, 116 Foy Union Bldg., Auburn University, AL 36849.

Washington Tigers Set Fifth Annual Trot for March 19

The Metro Washington, D. C., Auburn Club has scheduled its fifth annual "Tiger Trot" 10K road race for Saturday, March 19, at 8 a.m. The tax-deductible early registration fee for the event is \$10, with all proceeds going to benefit the Auburn University Scholarship Fund. The fee for entries postmarked after March 9, or on the day of the race, will be \$12. In addition to trophies for the top male and female finishers in the race's five age categories and in a special "heavyweight" division, all participants will receive Tiger Trot T-shirts. Other prizes will be awarded at a drawing following the race.

The race will be run on a certified course, in West Potomac Park on Ohio

Drive NW, near the Lincoln Memorial and the polo fields. Race packets may be picked up from 10 a.m. until 6 p.m. on Friday, March 18, at J. Lynn & Co. Endurance Sports located at 1900 Eye St., NW., or at the race site on Saturday beginning at 6:30 a.m. For entry forms and more information, contact Dick Meagher at (703) 768-0036, or write the MWAC Scholarship Fund, P.O. Box 2004, Arlington, VA 22202.

Alumni Directories Soon to be Out, Now Taking Orders

Harris Publishing Co., publishers of the upcoming Auburn Alumni Directory, will be calling many alumni at home in the coming weeks to confirm information on addresses, telephone numbers, etc. The company is publishing a directory of alumni by authorization of the Alumni Association. Information in the directory was gathered by mail and phone solicitation.

The directory is scheduled for publication in July and is available in two editions. A publication is available softbound for \$46.95, while the hardcover edition is priced at \$49.95. There is also a \$4.95 shipping and handling charge. To order, contact Liz Galen, Supervisor, Customer Service Dept., Bernard C. Harris Publishing Co., Inc., 3 Barker Ave., White Plains, N. Y. 10601, or call (914) 946-7500.

Hot Dye Tie Sales Provide \$16,000 For Scholarships

Auburn's general scholarship fund is already more than \$16,000 richer thanks to the sale of "Dye Ties" provided to the athletic department by supporters of Syracuse University. More than 2,000 ugly ties were mailed to Coach Pat Dye by the Syracuse fans to commemorate Auburn's 16-16 tie with the Orangemen in the 1988 Sugar Bowl.

Rather than let this generous gesture go unnoticed, Coach Dye is selling the ties—complete with his autograph and the Sugar Bowl score—for a \$100 donation. All proceeds go to the general scholarship fund, which helps provide financial support for academically-gifted students wishing to attend Auburn.

To get your souvenir "Dye Tie," send a check or money order payable to the Auburn University Foundation to Jennifer Weete, Auburn Athletic Dept., P. O. Box 351, Auburn, AL, 36831-0351.
